Creating Your First Pricing Page Template:

- Access the Widget Dashboard: From your main dashboard, click the vibrant "+ Create Widget" button to initiate the design of your first pricing page.
- Navigate to Templates: You'll be taken to our diverse Template Library. Here, we offer a range of pre-designed pricing page templates that you can adapt to suit your needs.
- Profile: Access your profile information by clicking on profile in the navigation bar. Here, you can likely view and update your account details, email Id, stripe key, and past payments.
- My Widgets: This section within the navigation bar allows you to manage all the widgets you've created. You can likely view, edit, delete, or share your widgets here.

Bill Brilliance Plans and Downloading Code:

Bill Brilliance offers two plans: Basic and Premium.
The Basic plan allows you to create and edit widgets, but it has limitations on downloading code and generating sharable links.
To download the code for your widget or generate a sharable link, you'll need to upgrade to the Premium plan.
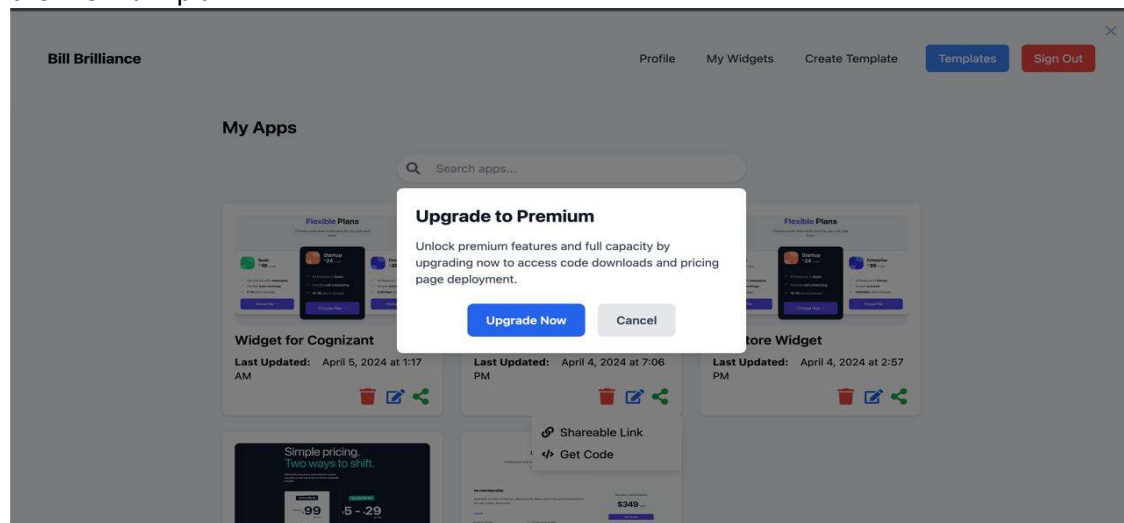

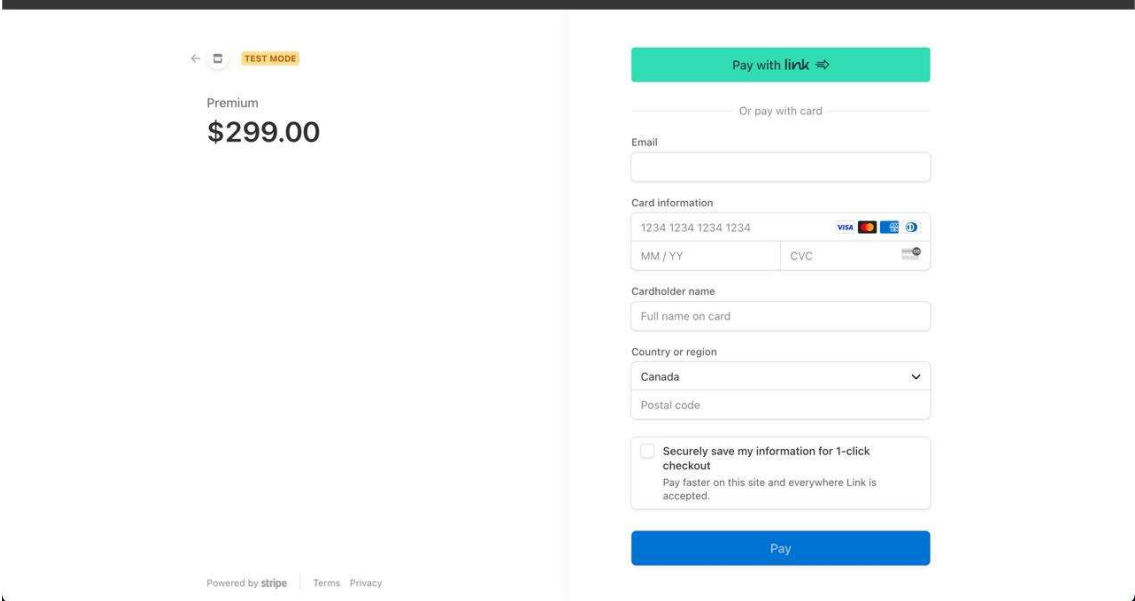

Upgrading to Premium:

Upgrade Pop-up: Clicking "Upgrade to Premium" on the pop-up will initiate the upgrade process.

Pricing Page: You'll be redirected to a pricing page that details the Premium plan's features and costs.

Payment: The pricing page should provide options to make a payment using a secure payment gateway. Bill Brilliance allow payment through stripe.

Success or Failure: After attempting payment:

Success: Upon successful payment, you'll be redirected to a success page from Bill Brilliance, indicating your plan is now Premium.

Failure: If the payment fails, you will be redirected to a failure page.

Downloading Code After Upgrading:
Once your account is upgraded to Premium, return to the widget editing page and try downloading the code again. The "Download Code" option should now function properly, allowing you to save the code for your widget.

Generating Sharable Links (Premium Plan):
Like downloading code, generating sharable links is also likely a Premium plan feature.
The process for obtaining a sharable link will be similar to downloading code. Look for a "Shareable link" option within the widget editing page. Upgrading to Premium should unlock this functionality.

Template Search:
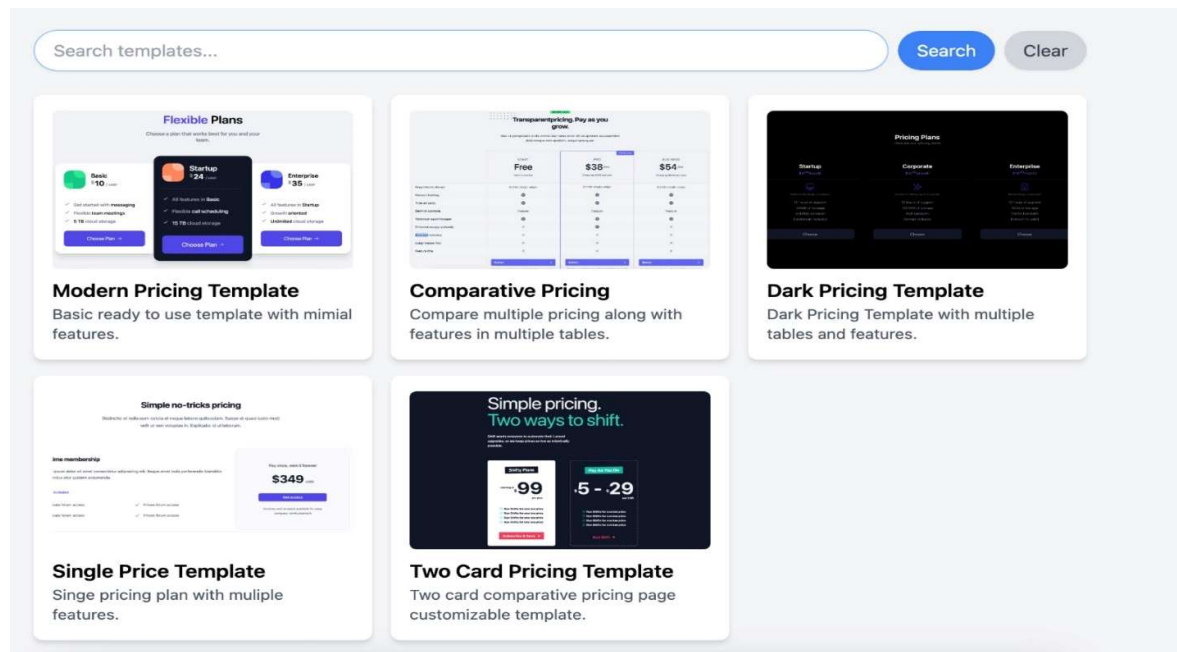

The templates page in Bill Brilliance allows you to browse and select pre-designed templates for creating widgets. These templates provide a starting point with predefined layouts, elements, and formatting that you can customize to suit your specific needs.

Navigation:
You can access the templates page by clicking on the "Templates" tab (shown in the image) in the navigation bar.

Searching for Templates:
Search Bar: In the top right corner of the page, there is a search bar (shown in the image) that allows you to filter templates by keyword or category. Enter a relevant term and press "Enter" or click the search icon to find matching templates.
Clear Button: The "Clear" button (shown in the image) next to the search bar can be used to clear your search query and return to the full list of templates.

Browsing Templates:
The main section of the templates page displays a grid of available templates. Each template card includes:

- Template Preview: A visual representation of the template's layout and design.

- Template Title: A name that identifies the template's purpose or content.
- Brief Description: A short text blurb that provides a high-level overview of what the template offers.

Selecting a Template:

Click on the desired template card to view its details and customization options.

Additional Notes:

- The specific customization options available for each template will vary depending on the template's design and functionality.
- After selecting a template, you will be directed to a widget editing workspace where you can further customize the template and add your own content to create your final widget.

Adjust Template Settings:
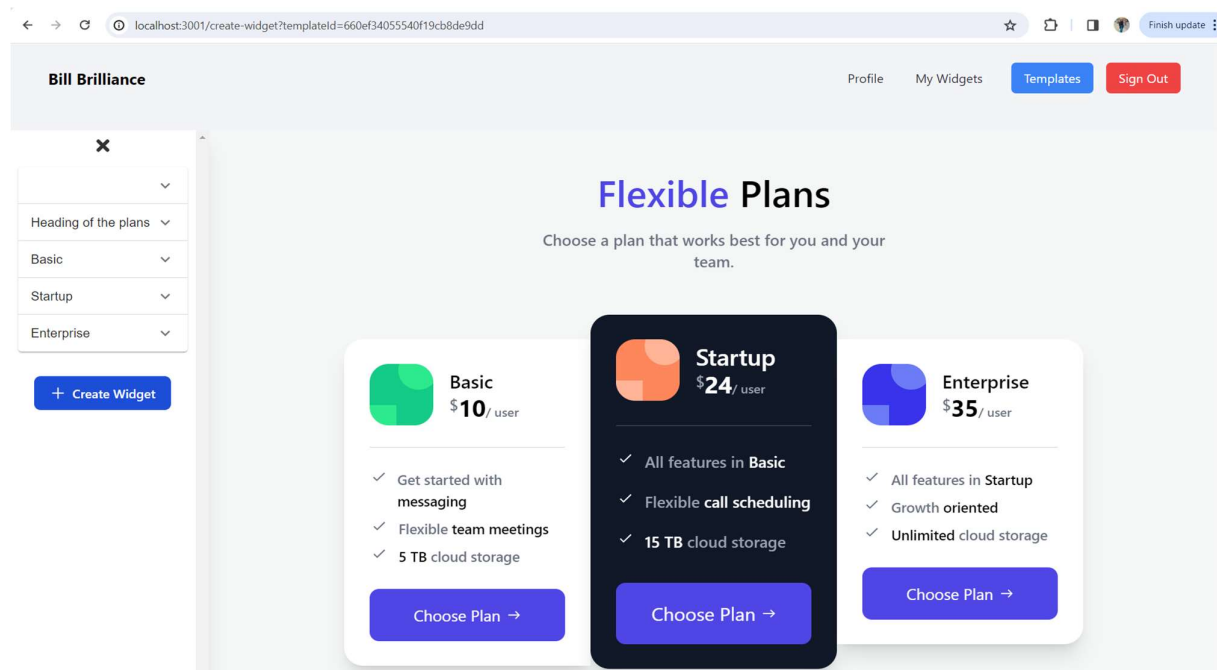

The edit template page allows you to customize a pre-selected template to create your widget. You can modify the template's content using the editing tools and options provided. The sidebar on the left-hand side offers features to manage your widget's overall structure and appearance.

Navigation:

You likely reached this page after selecting a template from the templates page.

Understanding the Interface:

Template Editing Area: The main portion of the page (occupying most of the space) is where you can visually see and make edits to your template. This will be a WYSIWYG (What You See Is What You Get) editor where you can directly interact with the template elements.
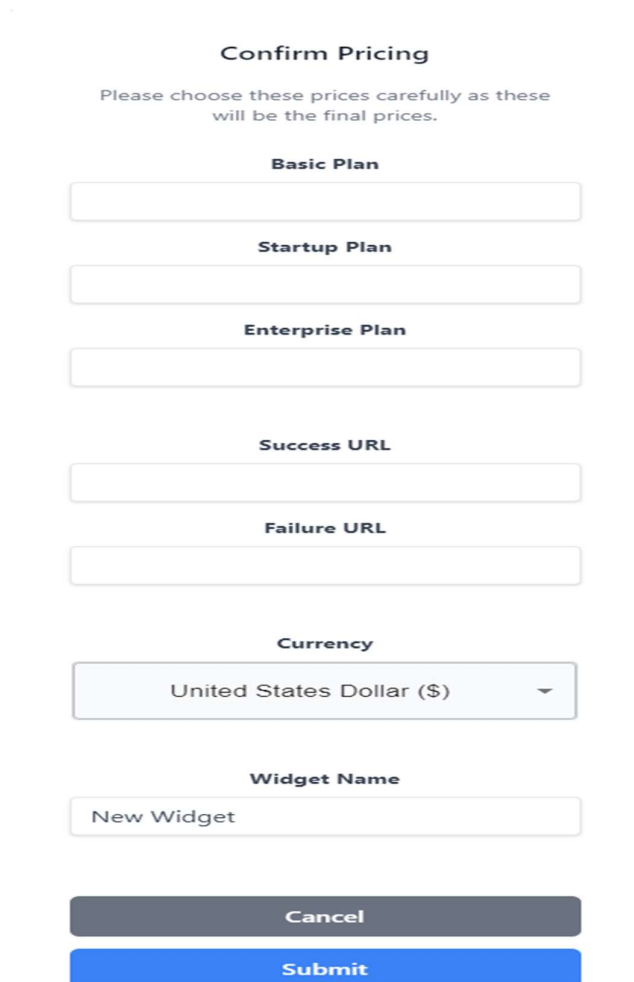

Sidebar: The sidebar on the left-hand side of the page offer options to manage your widget's structure and presentation.

Preview Your Changes: On the right, you'll see a live preview of your pricing plan. As you make changes in the sidebar, watch your template update in real time to ensure accuracy and satisfaction with the layout and content.

Creating Your Widget:
"Create Widget" Button: Once you've finished editing the content, locate the "Create Widget" button at the left side of the page).

Completing Widget Creation:

"Create Widget" Button: Once you've finished editing the content in the template, click the "Create Widget" button.

Confirm Pricing: After clicking "Create Widget," you'll be presented with a confirmation window to set the final pricing for each tier of your widget. Bill Brilliance offers different pricing tiers (e.g., Basic, Startup, Enterprise) that you can define the price for.

Enter Pricing: Carefully enter the desired price for each tier in the corresponding fields.

Success and Failure URLs: Provide the URLs for the following:

Success URL: The web address that users will be directed to if they successfully interact with your widget (e.g., Successful payment).

Failure URL: The web address that users will be directed to if there's an issue with interacting with widget.

Currency: Bill Brilliance displays the default currency or allow you to choose the currency for your widget's pricing.

Widget Name: Enter a name for your widget. This name will be used for your reference within Bill Brilliance.

Submit: Once you've reviewed and entered all the required information (pricing, URLs, widget name), click the "Submit" button to finalize your widget creation.

Saving and Accessing: Upon submitting, Bill Brilliance will process the information, create the widget, and save it within your account. You can then access and manage your widget from the "My Widgets" section within Bill Brilliance.

Dashboard Features:
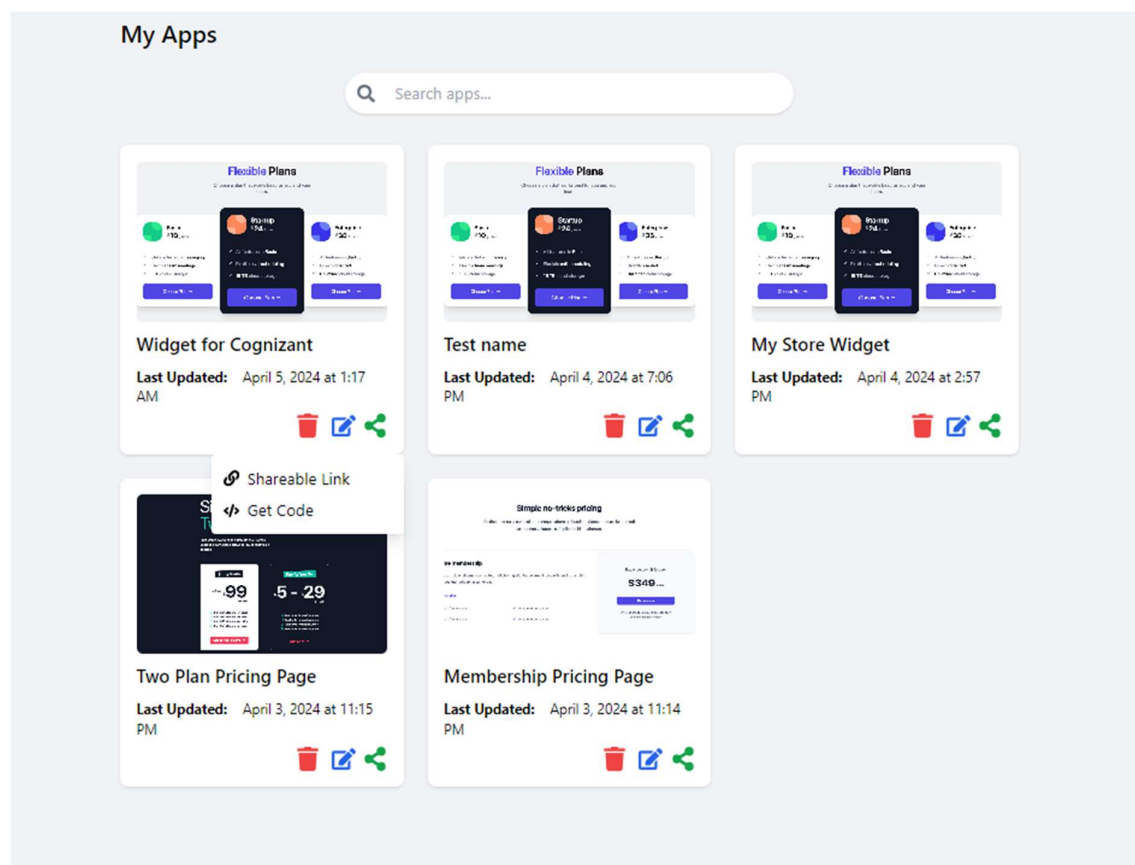

The My Apps page in Bill Brilliance provides an overview of all your created widgets and allows you to manage them.
Navigation:
Access the My Apps page by clicking on the "My Widgets" tab in the navigation bar.
My Apps List:
The page displays a list of your widgets. Each widget card includes:
- Widget Title: The name you assigned to the widget during creation.
- Last Updated: The date and time the widget was last modified.
- Preview Image: A small image that visually represents the widget's layout.

Editing a Widget:
Click on the desired widget card to access its details and editing options. Bill Brilliance will take you to the edit template page where you can modify the content and customize the widget further.
**Additional Options:**
Sharable Link: You will be able to generate a sharable link for your widget, allowing you to share it with others or embed it on external websites. Look for a "Shareable Link" option within the widget card or editing page.
Code: Bill Brilliance offers the option to generate code for your widget, allowing you to integrate it directly into your own website. Look for "Get Code" option within the widget card.

Other Features:
Search: A search bar at the top might allow you to filter your widget list by name or keyword.

Share Widget:
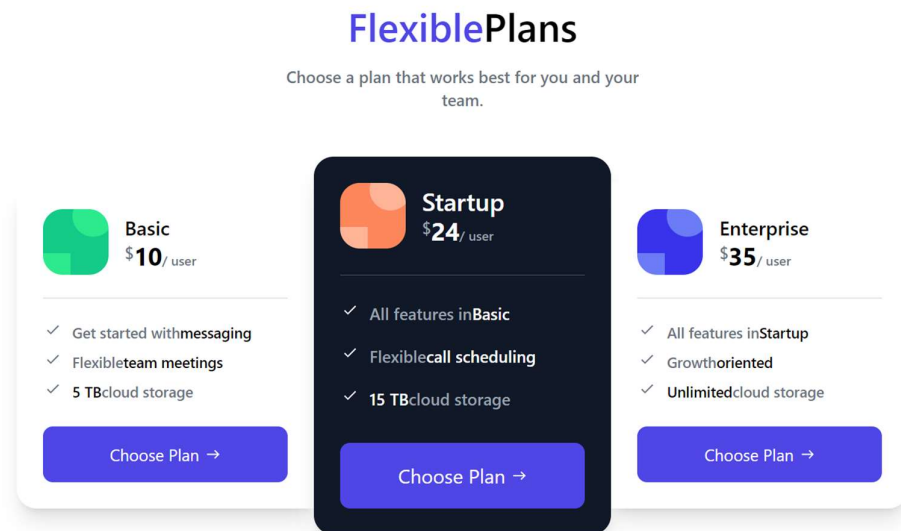

Navigate to the My Apps page and locate the widget you want to share. Open it for editing. Bill Brilliance might also allow you to generate a shareable link directly from the My Apps page without needing to edit the widget. In the above screenshot we can see the template through the link generated by the Bill Brilliance.
Using the Shared Link:
Once you have the sharable link, you can copy and paste it anywhere you want others to access your widget. Here are some common use cases:
Social media: Share the link on social media platforms to allow your followers to interact with your widget.
Website: Embed the link on your website using an iframe or other embedding methods Bill Brilliance might provide.
Email Marketing: Include the link in your email marketing campaigns to direct subscribers to your widget.
**Payments Through Shared Links:**
Users who access the widget through the shared link might be able to make payments directly within the widget through stripe itself. Bill Brilliance allows you to configure

payment behaviour for your widget when users access it through the shared link. This is done by specifying Success URLs and Failure URLs when you save your widget.

Success URL: When a user successfully completes a payment within widget, they will be redirected to the Success URL you defined.

Failure URL: If a payment attempt fails due to any reason, the user will be redirected to the failure URL you specified. This URL could be a page on your website that explains the payment failure and offers troubleshooting steps.

Profile Page:
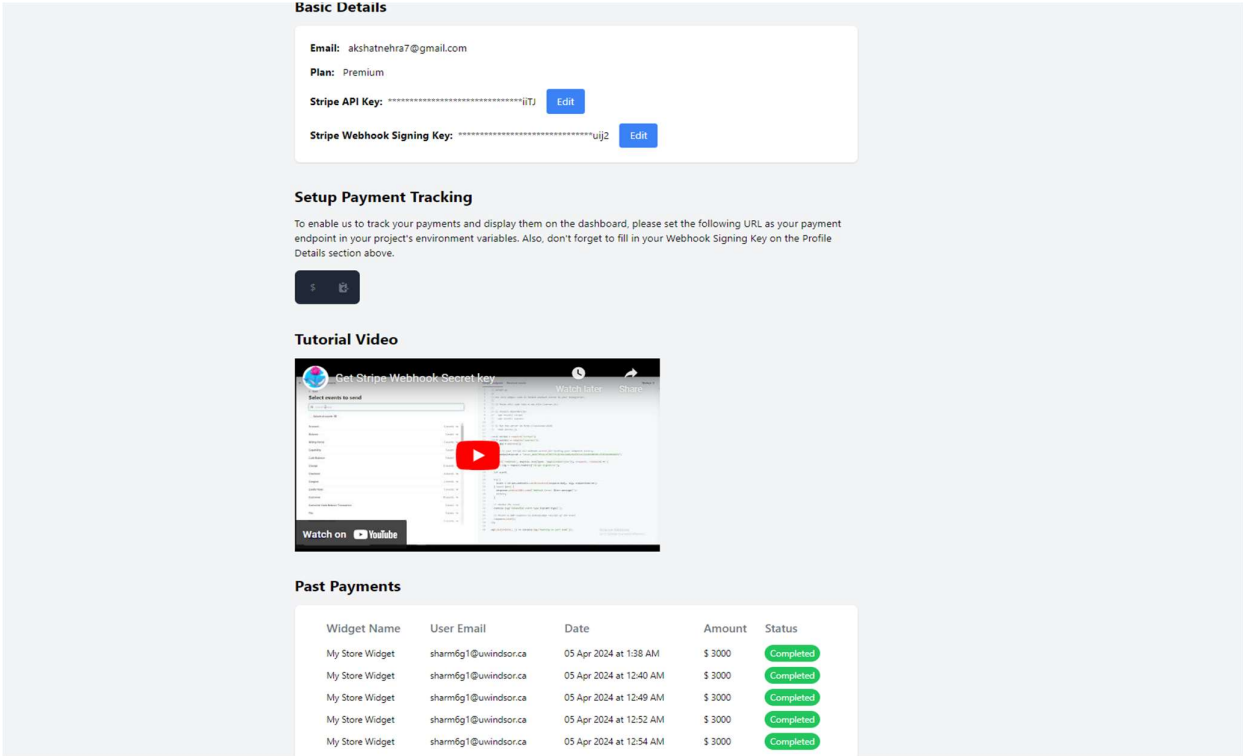

Click on your profile in the navigation bar to access your profile page.

Profile Overview:

The profile page provides a central location to view and manage your account information:

Basic Details:

Email: This section displays your registered email address.

Plan: It shows which plan user has subscribed to.

Stripe API Keys:

A section labelled "Stripe API Key" displays your Stripe publishable API key. This key is used to connect your web project with Stripe for payment processing. We strongly recommend against sharing your Stripe API keys with anyone.

Hide Button: A "Hide" button below to your Stripe API key allows you to mask the key for security purposes. Clicking it again might reveal the key when needed.

Stripe Webhook Signing Key: Similar to the publishable key, you see your Stripe webhook signing key here. This key is used to verify the authenticity of incoming data from Stripe. Treat it with the same level of confidentiality as your publishable key.

Past Payments:

A table labelled "Past Payments" displays a history of your payment transactions within Bill Brilliance.
Each entry includes details such as:
Widget Name: The name of the widget associated with the transaction.
Date: The date the transaction occurred.
Amount: The monetary amount of the transaction.
Status: The status of the transaction (e.g., "Completed," "Pending," "Failed").

Create Template:

The Create Template page allows you to design your own custom widget templates from scratch.
Navigation:
Click on the "Create Template" button on the navigation bar.
Creating a Template:
Template Title: Enter a descriptive name for your template in the "Template Title" field. This name will help you identify your template later.
Template Description: Provide a brief explanation of what your template offers or its intended purpose in the "Template Description" field.
Template Image URL: If your template has a visual component, you can provide a link to an image URL in the "Template Image URL" field. This image serve as a preview of your template's design.

Template Code: The "Template Code" section involves entering code to define the structure and functionality of your widget. Bill Brilliance uses a specific templating language for this purpose.

Reviewing and Adding Headings:

Review Template: Once you've filled out the form, click the "Review Template" button. This takes you to a preview mode where you can visually see your template's layout and content. Headings: Bill Brilliance allows you to add headings by right clicking on that field within your template to structure the content and improve readability

Saving and Using Your Template

Look for a "Submit Template" button after you've finished reviewing your template. Once saved, your template should be accessible within your Bill Brilliance account, in the "My Templates" section. From there, you can use the template to create a widget by following Bill Brilliance's instructions for using templates.
